HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We prefer for each of you to be in attendance on sale day. Realistically, we know there will be some scheduling conflicts and distance limitations. In these cases, we have arranged for you to be able to participate in the sale on an absentee basis. Please feel free to call us with questions. The sale will be broadcast on the Internet by Superior Productions.

HERE'S HOW IT WORKS

Please call Superior Productions at **800-431-4452** and pre-register for your buyer's number. At that time they will give you the bid line number that you will use on sale day to place bids over the phone. The sale will be broadcast via satellite on RFD-TV - Dish Network channel 231 and DirecTV channel 345. Also, Superior Productions now offers the convenience of participating on sale day by following the auction on the internet at www.superiorclicktobid.com. The bidding process is the same - follow the auction on the internet and call the bid line number to place your bids. Bidders who are successful in making purchases via satellite or internet will be contacted by Ranch after the sale to settle payment and shipping arrangements.

INSURANCE

Livestock mortality insurance will be available sale day. Please see the clerking office for more information.

TRANSPORTATION

- FREE DELIVERY offered any bull purchased needing transportation to Texas, New Mexico, Oklahoma, Louisiana and Arkansas.
- FREE DELIVERY offered to central points anywhere in the continental United States for any buyer purchasing 10 or more bulls.

TERMS & CONDITIONS

All cattle are to be settled for sale day prior to load out. They sell under the terms and conditions as recommended by the American Angus Association with these exceptions: announcements made from the sale block or supplements to the sale booklet take precedence over what is written in the sale book. The sale day supplement will give updated information. Supplemental information and sale order will be available sale day.

LIABILITY

All persons attending the sale and related functions do so at their own risk, legal or otherwise, for their safety or the behavior of the animals. The owners and sale facility assume no liability for loss or damages however so caused.

HERD HEALTH

All cattle sell with health papers for immediate interstate shipment in the continental United States.

- Coming Two-Year-Old Bulls

All bulls are guaranteed to be fertile. Please note the ASH Angus first year breeding guarantee on page 3 of this sale book. We recommend an annual fertility exam before turn out each year.

- Fall Yearling & younger Bulls
Guaranteed to be fertile but should be fertility tested before pasture exposure.
- All Bulls

Received vaccinations, including:

As calves twice BoviShield 5 Gold Pfizer, twice Vision 20/20 7-Way Blackleg, One Shot Pasterilla Pfizer, back poured with Cydectin Fort Dodge (and again at weaning). In June 2011, they were back poured with Cydectin and genetic tested, and in September, all health work for the sale testing plus vaccinated again with BoviShield 5 Gold and Hjargio SpiroVac VL5 Pfizer.

All bulls are virgin bulls ready for heavy service.

ASH Angus, LLC is proud to help "Target the Brand" with Certified Angus Beef®.

"Our registered cows are pastured and run in tough West Texas

ranching conditions. These cows have to perform and reproduce in similar conditions to our range bull buyers' environments. The bulls and their heifer siblings only make it if they survive our rigorous standards in often difficult West Texas conditions."

- Andy Holloway

Welcome to the Sale!

Dear Friends and Fellow Cattlemen:

Welcome to the 4th Annual ASH ANGUS BULL SALE! It seems like just yesterday since last year's sale but what a difference a year makes. It is amazing just how quick things can change and how we must adjust to survive and prosper. It seems like in Texas it is either feast or famine, and right now it's truly famine. To survive to find water, grass, hay and to avoid severe fire danger, we have had to ship most of our cows somewhere else. To give credit where credit is due, God has opened the doors and provided several great locations with wonderful people for our cattle so we could keep them. Though it is extremely difficult, we are making it and we continue to pray for our land, neighbors and way of life in Texas agriculture. We are among many throughout several states that are in the same dilemma of severe drought.

With all of that out of the way, this offering is incredible with many outstanding bulls that are power packed with superior Angus genetics and great quality conformation, as well. We have purposely designed the genetics to meet the need of today's beef cattle industry. The bulls are low to moderate birth, high in weaning and yearling weight EPDs and carcass strong, high in both marbling and muscle (RE). However, if I may, I want to express my opinion about our strategy to breed Angus: different from many breeders, we do not breed our cattle on paper just for EPDs, like \$B value. That doesn't mean that we don't use all of the EPDs as tools, but many other things like structural soundness, scrotal and udder quality, moderate frame and ease of keeping, fertility and overall conformation that expresses a big butt and long body. These traits, and others, are all just as important as some of our EPDs and have to be considered too. Angus cattle that just have high \$B values are not necessarily good or right for the cattle business. We are striving to produce Angus that work all the way around, that are not part of a fad or judge's style in the show ring, that does not work for you.

ASH Angus is committed to breeding like the bulls we are selling that will help add value to your program through a genetic product that is sound, reliable, predictable and proven. There are over 60 "Low Birth, Low Risk Bulls" genetically designed to add reliable Angus calving ease that work perfect for heifers and will also work for your cow herd as dual purpose bulls. We have clients that have bought heifers bulls from us that tell us their calves out of their first-calf heifers are better than their cows' calves. The sires of the low risk heifer bulls are Calving Ease 4056, Mytty In Focus and S S Objective. These sires consistently produce lower actual birth weight but also calves that are made right to reduce calving problems in first-calf heifers.

The "Balance Bulls" in the sale are also lower birth weights than the power bulls but maybe not make heifer bull status in our ranking system. The "Balance Bulls" offer great growth with lower birth weight and excellent carcass and \$B values. S S Objective is the primary herd sire of what we call the "Balance Bulls," and there are over 50 of them in the sale. These bulls are outstanding on paper and to the eye. I really believe the calves they produce will top most markets.

The "Power Bulls" in the sale are mostly sired by Angus sires like G A R Predestined and Summitcrest Complete 1P5. These "Power Bulls" are deep, stout, thick and tremendously growthy, expressing outstanding weaning and yearling EPDs. The "Power Bulls" are suggested by ASH Angus to be used on your cowherd. These bulls will produce heavy weaning weights and outstanding carcass data for whoever feeds the cattle to the fat cattle stage. CAB® is where the rubber meets the road, and we believe all of our bulls have the genetic reach to produce a very high percentage of CAB® carcasses for the beef business.

Our bulls are guaranteed and please note the FREE DELIVERY POLICY. We have done all we can to make these great Angus bulls an excellent investment for your program. With high cattle market prices, there has never been a better time to use quality cattle in your breeding program. Please give us a call or email if you have questions or need assistance.

Finally I'm going to be bold with my closing thoughts, the Word says "If you but have the faith of a mustard seed you can move mountains" and this year, like so many others, our mountain is this record breaking drought. Because of the drought, we really need everyone's prayers and assistance to survive this season. It been real tough for our family, and I'm not saying that for sympathy, but rather your assistance. Please let your neighbors know about our sale or any one else that might need some bulls. We sorely need everyone's help this year to get our bulls sold - thank you so very much.

I appreciate every person. Please attend our Angus event and enjoy some West Texas Angus Hospitality.

My best personal regards,

Andrew "Andy" Holloway

About the Bulls

Since these bulls were calves they have been managed with the thought of growing them to be able to express their maximum genetic potential, while keeping in mind their structure and reproductive performance. They were not creep fed but the bulls did learn to eat cake with their dams. They will come to your horn or siren or, if you're like me, your own cattle call. Our bulls are developed on a high percentage of roughage with 12% protein and limited grain. These bulls can walk and cover the country - they are hard footed and sound.

VACCINATIONS:

- As calves, twice BoviShield 5 Gold Pfizer, twice Vision 20/20 7-way Blackleg, One Shot Pasterilla Pfizer, back poured with Cydectin Fort Dodge (and again at weaning)
- June 2011 they were back poured with Cydectin and genetic tested
- September 2011 all health work for the sale testing, plus vaccinated again with BoviShield 5 Gold and Hjargio SpiroVac VL5 Pfizer

HEALTH TESTS:

- All bulls meet all state and federal health requirements and sell with health paper for immediate interstate shipment.
- All coming two-year-old bulls are fertile and ready for heavy service. Please note the first year breeding guarantee listed below. All bulls are fully guaranteed according to the terms and breeding conditions of this sale, and the terms and conditions recommended by the American Angus Association.
- Texas is a Certified Brucellosis and TB Free state.

FIRST YEAR BREEDING SEASON 100% SATISFACTION GUARANTEE:

All bulls selling for \$2000 or more will be covered 100%, less salvage value, by ASH Angus, LLC, if they are injured during the first breeding season and not able to return to service that first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bull. 100% of the value of the injured bull, minus the salvage value, will be given as credit at a future ASH Angus, LLC sale or toward a replacement from ASH Angus, if one is available. Any injured bull must be diagnosed by a veterinarian and all claims must be made by June 1, 2012.

FREE DELIVERY:

On any bull purchased, free delivery will be offered to any purchaser within Texas, Oklahoma, New Mexico, Arkansas or Louisiana. Free delivery is also available to central points in the continental United States with the purchase of ten or more bulls. Bulls will be delivered within a reasonable time after the sale.

SALE BOOK INFORMATION:

Information presented in this book is accurate to the best of ASH Angus, LLC's knowledge. Any additional data will be provided sale day on the supplement sheet. Please note:

- Scrotal measurements will be available sale day.
- EPD values highlighted rank in the top 10% for all non-parent bulls.
- Please note GREEN lot #'s represent POWER BULLS; MAROON lot #'s represent BALANCE BULLS; TURQUOISE lot #'s represent LOW BIRTH BULLS.

EPDs ARE SEVEN TIMES MORE RELIABLE THAN ACTUAL WEIGHTS

EXPECTED PROGENY DIFFERENCES (EPDs):

ALL YOU NEED ARE EPDs. We are striving to give you the rancher and producer the information you need to make informed decisions so that you can advance your beef cow program. The American Angus Association (AAA) has purposely created EPD's to give you good information about the cattle being sold in this sale. Many sales give all kinds of other information but in our minds it is so easy to get confused trying to decide what one should emphasize or not. We believe the information we have sent to the AAA through the Angus Herd Improvement Records (AHR), including: birth weight, weaning weight, yearling weight, scrotal circumference and ultrasound data, which is used to generate EPDs, is all you need to make good decisions. Please contact us if you have questions.

According to AAA, Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

For more information regarding EPDs, log on to AAA website at www.angus.org. Definitions for each EPD used in this book are as follows:

PRODUCTION

- **Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.
- **Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.
- **Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.
- **Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

MATERNAL

- **Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

CARCASS

- **Carcass Weight EPD (CW)**, expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.
- **Marbling EPD (MRB)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.
- **Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.
- **Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and calves were exposed to the same environment.

- **Weaned Calf Value (\$W)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.
- **Feedlot Value (\$F)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.
- **Grid Value (\$G)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.
- **Beef Value (\$B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

0352 is quite a great young Objective X "Fancy" our great donor that is predictable and growth driven. 0352 is on the thickest muscled Angus bulls we have ever raised, if you like big thick butts on your calves this is a young herd sire prospect you must see, he 's got it. Of course SS Objective continues to produce low to moderate birth weights great WW & YW plus super carcass numbers. Adding "Fancy" to the mix you really have a lot of muscle and even more growth. She is one of the greatest and most consistent growth producing cows in the breed.

0352 is in the EPD top 5% WW; top 2% YW; top 5% RE; top 10% \$B

Compass of ASH 9800 is certainly one of the most exciting young herd sires in the Angus breed today by SS Objective T510.. Compass is made so impeccably well being extremely deep, thick and very gentle. He can breathe air and gain weight so I guess that explains the reason he had a 205 adj weaning weight of 847 lbs. starting with a 77 lb birth weight. He didn't stop there either he had a 1305 yearling weight and posted an impressive 15.2 REA posting an impressive 1.2 square inches of ribeye per hundred lbs of yearling weight. Please not the pedigree combination of the Performance Producing SS Objective plus his dam the great 1407 daughter out of the GAR Pinnacle daughter on the bottom side of the pedigree. The most impressive part is what these parents established in Compass as an incredible Angus Spread Bull. 9 BW to 64 WW to 106 YW making his EPD profile come out to be top 5% BW; top 2% WW; top 5% YW; top 10% MB; top 5% RE; & top 5% \$B we think the numbers are important but just as important are the attributes of phenotype that make this young sire very special. We have bred him to over a 100 cows & heifers for calves next spring. Compass is very sound, loaded with butt & top, he is extremely deep sided & voluminous with phenomenal capacity. His dam the awesome L194 is loaded with these same traits. Oh & by the way we sold L194 in our first production sale to Ozark Hills Angus in Missouri for \$10,500. She has a great home and is in embryo production there today. She is a trait leading cow for both growth & carcass.

SEMEN FOR SALE ON COMPASS OF ASH 9800 \$20/STRAW plus shipping & handling AI certificates \$30. Please call to order your semen on Compass as soon as possible. Sirmon is co-owned with Rick, Ann & Chris Sirmon, Robertsdale, Alabama.

T M H Miss VRD 521

Sirmon of ASH 9803 sired by Gardens Wave & out of TMH Miss VRD 521 "Fancy" is one of the best looking young bulls you can see in the breed. Sirmon is moderate birth, stout weaning & yearling and super carcass. We absolutely love the Wave calves they are moderate framed & very thick with tremendous keeping ease, muscle, marbling & excellent dispositions. Sirmon is the Wave leader in our herd out of the famous "Fancy" donor that won Ft. Worth in 2007 and is now one of the strongest growth producing donors to be found in the breed. When one evaluates the EPD's along with this bull's conformation one must just love him. EPD's top 20% WW; top 25% YW; top 15% MB top 5% RE & top 10% \$B. These are excellent number and when you see the bull and notice how impressive he is then you really get excited. Sirmon's sire Gardens Wave I think is the most over looked Angus Sire in the breed. Wave is not a big growth producer but Sirmon's dam "Fancy" is in the top 1% of the breed for both WW & YW so there you go it all fits. Plus Wave is an ideal low birth & is low risk birth weight sire also at one time he was the #2 sire in the breed for marbling. So with Wave one gets low birth, impeccable carcass and tremendous \$B. We think Sirmon is somewhere between which makes him ideal for our breeding program & an outcross for most in the breed genetically. We have bred him to over a 100 cows & heifers for calves next spring.

SEMEN IS FOR SALE ON SIRMON OF ASH 9803 FOR \$20/STRAW plus shipping & handling. All certificates will priced at 30/certificate. Sirmon is co-owned with Rick, Ann & Chris Sirmon, Robertsdale, Alabama.

This cow represents the very essence of our herd. Fancy was AI produced from our breeding program in 2005, and she turned out to a great show heifer that was named the 2007 Ft. Worth Champion Junior Angus Heifer. Little did we know that she would dominate in the breed through her progeny producing top performing EPDs for growth and muscle equally. Genetically made to perform, her natural calves ratioed 2@125 WW, 2@141 YW, and 2@120 RE. Fancy is the dam of the herd sire, Sirmon, we raised and now co-own with Rick, Ann and Chris Sirmon, of Robertsdale, AL.

	G A R Plowman G240	

7137 is the smallest framed cow we own but she is very long, thick, straight and productive. As I analyze cattle I view them as breeding pieces that if mated correctly will produce progeny that are better than they themselves. This cow has the highest Marbling EPD of any cow in the herd & she has nick extremely well to Ambush 28 the #1 \$B sire in the breed. Ambush 28 is to big framed for me to use generally across my herd but on cows like 7137 he is ideal and just wait to see the sons of this mating in the sale. 7137 EPD's top 40% WW; top 25% YW; top 1% MB; 1% RE & top 3% \$B.

S223 is one of my favorite ASH Angus donors we purchased her several years ago from Stevenson Angus, Hobson, MT & what a great cow she has become for our embryo program. S223 is moderate in frame, very long bodied, thick muscled, easy keeping and has a very strong production producing ability. She ranks in the top 20% for WW; top 30% YW; top 10% MB; top 5% RE & top 5% \$B.

Sale Dedication

It has been my tradition to dedicate the sale each year to significant people in my life that have had a direct bearing on the dream of my life that has come true through this business.

I am so honored to recognize and express my gratitude by dedicating this years sale to **HOWARD AND CARYL LAWRENCE**, Rising Star, Texas. This wonderful couple, plus their four beautiful children, Aubry, 16, Matthew, 13, Karen, 8, and Colt, 4, have served my family, ASH Angus and the many others they encounter through Church, 4-H, FFA, school activities, Bible Study and a host of many others daily. As I have thought who to dedicate the sale to this year, I can readily confess that many people have made huge significant acts to make this sale happen, and it would not have happened had they not prayed and worked to assist us with this endeavor. However, without Howard and Caryl, we might not even be in business. They are wonderful, remarkable Christian people that put others interests, including ours, in front of their own to serve.

Howard works with our cattle and oversees the Coleman ranch, plus our donor and AI program. Howard is a man of his word and always helps me to do whatever is before us. Howard you are a wonderful friend and I certainly appreciate all that you do for us and so many others. Howard serves as a deacon at their church, a school board member, 4-H leader and a perfect neighbor to his neighbors.

*The Lawrence Family -
Aubry, Howard, Caryl, Matthew,
Karen and Colt*

Caryl is certainly one of the finest people that Tanya and I have ever known. Caryl is very good at what she does and works every day wearing many hats as a great wife, mom, bible study student, 4-H leader and incredible record keeper for our Angus program. I do not have the words to share my gratitude and appreciation for Caryl. Her pleasant smile and encouragement to us during these times that are certainly challenging. Thank you Caryl so very much.

I have found when times are tough one finds out real fast who your true friends really are and without questions the Lawrence family has been loyal and loving through the days of drought, fires and hardship. Thank you and we love you, each and everyone.

Don't let 'em leave home without one!

If you have calves to market, don't let them leave home without an AngusSource tag. A recent third-party analysis of the Superior Livestock Auction data for 2008 showed that calves enrolled in AngusSource brought \$3.37/cwt more than non-verified calves, and \$1.29/cwt more than calves enrolled in other source and age-verified programs.

AngusSource is the most cost effective verification program available in the industry. The only program that guarantees Angus genetics, enrollment in AngusSource increases the marketability of your Angus-sired feeder calves and replacement females by:

- Verifying source and age
- Offering online marketing opportunities
- Documenting valuable health and management information
- Substantiating COOL claims
- Providing cattle an opportunity to qualify for Certified Angus Beef® regardless of hide color

To get started visit www.angussource.com to download the producer manual and enrollment forms or contact AngusSource at 816-383-5100.
